SINGAPORE CONSUMER PROTECTION (SAFETY REQUIREMENTS) REGISTRATION SCHEME

PREFACE

This information booklet serves as a guide to the definitions (Appendix A) and registration of controlled goods and other requirements related to the Singapore Consumer Protection (Safety Requirements) Registration Scheme or CPS Scheme and can be downloaded from the website www.spring.gov.sg/safety.

The Safety Authority reserves the right to amend and introduce new requirements to the aforementioned scheme without reference to the holder of this booklet and encourages feedback from readers to ensure that improvements to this booklet could be made from time to time.

Our address is:

SPRING Singapore
Consumer Product Safety Department
2 Bukit Merah Central
Podium Block
5th Storey
Singapore 159835

Telephone: 1800-7733163
Facsimile: (65) 6278 9885
Website: www.spring.gov.sg/safety

The Safety Authority also conducts training course for suppliers and retailers of controlled goods in Singapore. The training is for them to familiarise with the CPS Scheme and the requirements. Anyone who is interested in attending the course can register with the Safety Authority via telephone, facsimile or website. The Safety Authority will consolidate all requests and inform them of the course date.

2 INTRODUCTION

The objective of the Singapore Consumer Protection (Safety Requirements) Registration Scheme or CPS Scheme is to safeguard consumers' interest by ensuring household products, designated as controlled goods, meet the specified safety standards.

Undoubtedly, consumers today are prepared to pay for products that are safe and of high quality. The development of the CPS Scheme is therefore consistent with the growing sophistication of consumers in Singapore.

The CPS Scheme is administered by SPRING Singapore as the Safety Authority since 1991 by Ministry of Trade and Industry (MTI) under the Consumer Protection (Safety Requirements) Regulations 2002. One of the roles of the Safety Authority under the Regulations is to ensure compliance by industry on the registration of forty-five (45) categories of controlled goods. The definitions and applicable safety standards of the controlled goods are provided in Chapter 6 of this information booklet. To further assist suppliers, some examples of controlled and non-controlled goods are identified in Appendix J.

Registration of controlled goods under the Consumer Protection (Safety Requirements) Regulations 2002 is based on Certificate of Conformity (COC) issued by designated third party Conformity Assessment Bodies (CABs). An overall view of the registration process is shown in Appendix E.

All suppliers (please refer to Chapter 5) of controlled goods for consumers or for use in schools, educational institutions, hotels, offices, etc. (which are operated other than by staff and professionals) must first be registered with the Safety Authority as Registered Supplier. Registered Suppliers are required to register each model of controlled goods with the Safety Authority. The registration must be supported with **COC** issued by designated **CABs** located in **Singapore** or **MRA partners**, i.e. **CABs (Local)** or **CABs (Foreign - MRA)** respectively.

Once the model has been registered with the Safety Authority, the controlled goods can then be advertised and/or supplied in Singapore.

We would like to draw your attention to **Regulation 4(1)** of the Regulations 2002, where it is stipulated that no person shall trade, supply or advertise for the purpose of supplying any of the controlled goods in Singapore after the specified dates, unless the controlled goods are registered with the Safety Authority and are affixed with the **SAFETY Mark**. Hence, merely labelling products or stamping receipts 'For Export Only' is not an excuse for not registering controlled goods. **A person guilty of an offence, shall be liable on conviction, to a fine not exceeding \$10,000/- or to imprisonment for a term not exceeding two years or to both.**

3 WHO SHOULD BE CONCERNED WITH THIS SCHEME

Consumers

To safeguard consumers' interest, consumers are strongly advised to purchase controlled goods that are registered with the Safety Authority and are affixed with the SAFETY Mark. Registered controlled goods that have met the specified safety requirements help to prevent fire, electric shock, explosion, radiation and other hazards that could result in injuries or deaths to humans and/ or damages to private properties.

To assist in identifying the registered controlled goods, consumers can use the Register of Registered Controlled Goods available on the website www.spring.gov.sg/safety to guide them when making purchases.

Suppliers

Manufacturers, importers (including parallel importers), retailers and traders who are involved in advertising and/or supplying the controlled goods must ensure that their obligations under the Regulations 2002 are fulfilled.

This Information Booklet is to assist suppliers in understanding the requirements and procedures when they apply for registration of controlled goods. The Safety Authority will only accept applications from Registered Suppliers. A Register of Registered Suppliers is available on the website www.spring.gov.sg/safety.

4 KEY REGULATIONS

- Regulation 4(1): No person shall, in the course of any trade or business, supply or advertise for the purpose of supply any controlled goods after the effective date specified in the First Schedule unless-
- (a) such controlled goods are registered controlled goods conforming to the safety requirements specified by the Safety Authority for those goods; and
 - (b) such controlled goods have affixed to them the Safety Mark in accordance with Part III.
- Regulation 4(2): Where any person contravenes paragraph (1), he shall be guilty of an offence under section 11(2) of the Act, and the Safety Authority may-
- (a) require such person to effect a recall of the controlled goods and keep the Safety Authority informed of the progress of such recall; and
 - (b) take such steps as may be necessary to inform users of the controlled goods of the potential danger of such goods.
- Regulation 8(1): The registration of any controlled goods shall be valid for a period of 3 years or the period of validity of the certificate of conformity of the controlled goods, whichever is the less, and may be renewed.
- Regulation 24(4)(a) : A Registered Supplier who fails or neglects to effect a recall of the registered controlled goods required by the Safety Authority under paragraph (2)(b)(i) shall be guilty of an offence and shall be liable on conviction to a fine not exceeding \$2,000 or to imprisonment for a term not exceeding 12 months or to both.

5 PARTIES THAT NEED TO APPLY FOR REGISTRATION

Only one party in the chain of supply of the controlled goods in Singapore needs to register the controlled goods with the Safety Authority. No party shall be allowed to advertise and/or supply the controlled goods unless they have been registered with the Safety Authority. The registration is non-transferable and will be withdrawn when the party registered as '**Registered Supplier**' ceases to supply the controlled goods registered by it, for instances, where it ceases to carry on such business or is no longer registered with the Accounting & Corporate Regulatory Authority (ACRA) [formerly known as Singapore Registry of Companies and Businesses (RCB)].

Importer

Importers who import controlled goods that are meant for Singapore are required to apply for registration with the Safety Authority. No registration is needed if the controlled goods are meant for export only. However, these 'For Export Only' controlled goods shall not be advertised, supplied, displayed in any retail outlets and/or made available for sale in Singapore under any circumstances. Merely labelling the controlled goods or stamping the receipts with '**For Export Only**' is also not allowed.

Parallel Importer

Any parallel importer of the same brand and model of controlled goods are also required to apply for registration.

Retailer

Retailers are only required to apply for registration if they import the controlled goods themselves.

Manufacturer

Unless another party in the chain of supply has already registered the controlled goods with the Safety Authority, manufacturers in Singapore who supply the controlled goods to the domestic market are required to apply for registration.

New Distributor

Since the **Certificate of Conformity (CoC)** is not transferable, when a company (Registered Supplier) relegates its ownership of its registered controlled goods to another business entity, the latter has to re-register the controlled goods with the Safety Authority. Where the current Registered Supplier allows the new distributor to take over its existing registered controlled goods, submission of an authorisation letter from the former to the Safety Authority is required for the re-registration of the controlled goods for the latter. The letter must also indicate the effective date of taking over. Otherwise, the new distributor has to go to a **CAB (Local)** or **CAB (Foreign - MRA)** to obtain CoC prior to having the controlled goods re-registered with the Safety Authority.

6 CONTROLLED GOODS AND THEIR APPLICABLE SAFETY STANDARDS

Controlled Goods	Definitions	Safety Standards
Air cooler 	An electrically operated appliance for agitating the air equipped to use water as a cooling medium and its associated regulator intended for use on single phase a.c. and d.c. circuits not exceeding 250V for household and similar purposes.	IEC 60335-2-98: 2002
Adaptor 	A device designed to supply a.c. or d.c. power from an a.c. or d.c. source, either by itself or as part of an accessory, for applications such as computers, telecommunication equipment, home entertainment equipment or toys.	(applicable for electrical appliances) IEC 61558-2-6: 1997 or IEC 61558-2-16: 2009 (applicable for electronic appliances) IEC 60065: 2001 (applicable for computer / telephonic appliances) IEC 60950-1: 2001 (applicable for shavers) IEC 60335-2-8: 2002 (applicable for battery chargers) IEC 60335-2-29: 2002 with A1 or IEC 60335-2-29: 2004 (applicable for LED lightings) IEC 61347-2-13: 2006 (applicable for table/standing lamps) IEC 60598-2-4: 1997
Any other audio products 	Any other electronic device (other than High-fidelity set) for the reproduction of sound, connected to the supply mains, either directly or indirectly.	IEC 60065: 2001

Note: Controlled Goods are to be tested to the specified safety standards. Controlled Goods that are tested to later year/amendment of standard than the year/amendment specified above are also acceptable.

6 CONTROLLED GOODS AND THEIR APPLICABLE SAFETY STANDARDS

Controlled Goods	Definitions	Safety Standards
Cooking range 	A device for cooking and includes separate stationary ovens and grills, cooking table cookers, hob elements, grills and griddles which form part of cooking ranges, and ovens and grills for installation in walls except a cooking range having a mass of less than 18kg.	IEC 60335-2-6: 2002
Coffee maker, slow cooker, steam boat and similar appliances 	An electrically operated appliance that heats water up to high temperatures in the course of food and beverage preparation.	IEC 60335-2-15: 2002
Decorative lighting fixture 	Lighting chains fitted with a series or parallel connected incandescent lamps for use either indoors or outdoors on supply voltages not exceeding 250 volts.	IEC 60598-2-20: 2002
Hair dryer 	An electrically operated appliance intended to be used for the drying of hair of persons and incorporating heating elements.	IEC 60335-2-23: 2003
Home computer system (inclusive of monitor, printer, speaker and other mains operated accessories) 	A microprocessor based data system with compact, local computing and calculating power on high definition graphics and with flexible data communication interfacing.	IEC 60950-1: 2001

Note: Controlled Goods are to be tested to the specified safety standards. Controlled Goods that are tested to later year/amendment of standard than the year/amendment specified above are also acceptable.

6 CONTROLLED GOODS AND THEIR APPLICABLE SAFETY STANDARDS

Controlled Goods	Definitions	Safety Standards
High-fidelity set 	An electronic device for reproduction of sound, with little distortion, connected to the supply mains as the only energy source intended for domestic and similar general indoor use with a rated supply voltage not exceeding 250 volts rms.	IEC 60065: 2001
Iron 	An electrically operated appliance with heated soleplate for ironing of clothes, for household and similar purposes.	IEC 60335-2-3: 2002
Immersion water heater 	A portable household apparatus for heating liquid by immersing an electrically heated rod into it.	IEC 60335-2-74: 2002
Kettle 	Namely an electrically operated household appliance for heating of water for consumption, having a rated capacity not exceeding 10 litres.	IEC 60335-2-15: 2002 IEC 60335-2-21: 2002 (hot/warm water dispenser)
Laser disc set 	An electronic device for video recording and play-back or laser disc for play-back only connected to the supply mains, either directly or indirectly, and intended for domestic and similar general indoor use.	IEC 60065: 2001

Note: Controlled Goods are to be tested to the specified safety standards. Controlled Goods that are tested to later year/amendment of standard than the year/amendment specified above are also acceptable.

6 CONTROLLED GOODS AND THEIR APPLICABLE SAFETY STANDARDS

Controlled Goods	Definitions	Safety Standards
Microwave oven 	An electrically operated appliance for heating food and beverages using electromagnetic energy (microwaves) in one or more of the I.S.M. frequency bands between 300 MHz and 30 GHz and intended for household use. These appliances may also incorporate a browning function.	IEC 60335-2-25: 2002
Mobile split air-conditioner 	An enclosed mobile assembly designed to provide delivery of conditioned air to an enclosed space, room or zone, including an electrically operated refrigeration system for cooling and possibly dehumidifying the air.	IEC 60335-2-40: 2002
Mixer, blender, mincer and similar appliances 	An electrically operated machine for food and beverage preparation and intended for household use.	IEC 60335-2-14: 2002
Refrigerator 	A self-contained assembly consisting of a thermally insulated cabinet for the storage and preservation of foodstuffs above 0°C and of a refrigerating unit operating on the vapour compression principle and arranged to extract heat from within the cabinet, whether or not with one or more freezer compartments.	IEC 60335-2-24: 2000

Note: Controlled Goods are to be tested to the specified safety standards. Controlled Goods that are tested to later year/amendment of standard than the year/amendment specified above are also acceptable.

6 CONTROLLED GOODS AND THEIR APPLICABLE SAFETY STANDARDS

Controlled Goods	Definitions	Safety Standards
Rice cooker 	An electrically operated household appliance for cooking rice.	IEC 60335-2-15: 2002
Room air-conditioner 	A self-contained assembly designed as a unit, primarily for mounting in a window or through the wall or as a console. It is designed primarily to provide free delivery of conditioned air to an enclosed space, room or zone (conditioned space). It includes a prime source of refrigeration for cooling and dehumidification and means for the circulation and the cleaning of air, and a drain arrangement for collecting and/or disposing any condense. It may also include means for humidifying, ventilating or exhausting air.	IEC 60335-2-40: 2002
Television / video display unit 	Namely an electronic device for receiving and displaying information from a transmitting station or local source. The device is to be connected to the supply mains either directly or indirectly, and intended for domestic and similar general indoor use.	IEC 60065: 2001
Table / standing fan 	An electrically operated appliance for agitating the air, and their associated regulator intended for use on single-phase a.c. and d.c. circuits not exceeding 250V and intended for household and similar purposes.	IEC 60335-2-80: 2002

Note: Controlled Goods are to be tested to the specified safety standards. Controlled Goods that are tested to later year/amendment of standard than the year/amendment specified above are also acceptable.

6 CONTROLLED GOODS AND THEIR APPLICABLE SAFETY STANDARDS

Controlled Goods	Definitions	Safety Standards
Table lamp/ standing lamp 	A portable general purpose luminaire, other than handlamps, for use with tungsten filament, tubular fluorescent and other discharge lamps connected to the supply mains, either directly or indirectly.	IEC 60598-2-4: 1997
Toaster, grill, roaster, hot plate, deep fryer, wok and similar appliances 	Namely electric appliances connected to the supply mains, which make use of direct or indirect (e.g. heated medium such as air and cooking oil) heat for food preparation and intended for household use.	(applicable for toaster, hot plate (including induction type), grill, oven and similar appliances) IEC 60335-2-9: 2002 (applicable for deep fryer, electric wok and similar appliances) IEC 60335-2-13: 2002 (applicable for outdoor electric barbecue grill) IEC 60335-2-78: 2002
Video cassette recorder 	An electronic device for video recording and playback or for playback only, connected to the supply mains either directly or indirectly, and intended for domestic and similar general indoor use.	IEC 60065: 2001

Note: Controlled Goods are to be tested to the specified safety standards. Controlled Goods that are tested to later year/amendment of standard than the year/amendment specified above are also acceptable.

6 CONTROLLED GOODS AND THEIR APPLICABLE SAFETY STANDARDS

Controlled Goods	Definitions	Safety Standards
Vacuum cleaner 	A machine which removes dirt and dust by the suction produced by a motor-driven air pump, and intended for household use and similar purposes.	IEC 60335-2-2: 2002
Washing machine 	An electrically operated appliance intended for washing clothes and textiles (whether or not with means for water heating), for water extraction or for drying.	IEC 60335-2-7: 2000
Wall fan / Ceiling fan 	An electric fan and its associated regulator intended for mounting on the wall or ceiling and for use on a single-phase a.c. and d.c. circuit not exceeding 250V for household and similar purposes.	IEC 60335-2-80: 2002 and SS 360: 1992 (sub-clauses 5.7 & 5.8 only) (applicable for ceiling fan)

Note: Controlled Goods are to be tested to the specified safety standards. Controlled Goods that are tested to later year/amendment of standard than the year/amendment specified above are also acceptable.

6 CONTROLLED GOODS AND THEIR APPLICABLE SAFETY STANDARDS

Controlled Goods	Definitions	Safety Standards
Components of the LPG gas system – Hose 	A hose for use in domestic Liquefied petroleum (LPG) vapour phase and liquefied petroleum gas or air appliances not exceeding 5KPa (50 mbar) operating pressure.	SS 233: 1996
Components of the LPG gas system – Regulator 	A non-adjustable device that maintains the outlet pressure constant at a nominal value upto and including 50 mbar, independent, within specified limits, of inlet pressure or flow rate.	SS 281: 1984
Components of the LPG gas system – Valve 	A device that is made from brass, bronze or aluminum forging, for use with domestic liquefied petroleum gas cylinders, for control of the direction and volume of flow of the liquefied petroleum gas.	SS 294: 1998
Gas cooker 	A domestic appliance combining burners for cooking by gas.	EN 30-1-1: 1998 or AG 101: 1998
Gas canister 	A non-refillable metallic container up to 1.4 litres capacity filled with liquefied petroleum gases.	SS 400: 1997
Portable cooking gas appliance 	A portable cooking appliance that uses liquefied petroleum gas, obtained from a gas canister (A non-refillable metal container up to 1.4 litres capacity filled with liquefied petroleum gases), as fuel.	SS 401: 1997

Note: Controlled Goods are to be tested to the specified safety standards. Controlled Goods that are tested to later year/amendment of standard than the year/amendment specified above are also acceptable.

6 CONTROLLED GOODS AND THEIR APPLICABLE SAFETY STANDARDS

Controlled Goods	Definitions	Safety Standards
<p>3-pin rectangular type 13-amp plug</p> 	<p>A portable fused device having projecting pins designed to engage with the contacts of a corresponding socket-outlet. A plug also incorporates means for the electrical connection and the mechanical retention of a suitable flexible cord.</p>	<p>SS 145: Part 1: 1997</p>
<p>Fuse (≤13 amperes) for use in plug</p> 	<p>A device that, by the fusion of one or more of its specially designed and proportioned components, opens the circuit in which it is inserted and breaks the current when this exceeds a given value for a sufficient time. The fuse comprises all the parts that form the complete device.</p>	<p>SS 167: 1977</p>
<p>3-pin round type 15-amp plug</p> 	<p>A device carrying three metallic plug pins substantially cylindrical in form intended for engagements with corresponding socket contacts arranged for connection to a suitable flexible cord.</p>	<p>SS 472: 1999</p>
<p>Multi-way Adaptor</p> 	<p>An Adaptor having more than one set of socket contacts (the socket contacts may or may not be of the same type or rating as the plug pin portion)</p>	<p>SS 246: 2004</p>

Note: Controlled Goods are to be tested to the specified safety standards. Controlled Goods that are tested to later year/amendment of standard than the year/amendment specified above are also acceptable.

6 CONTROLLED GOODS AND THEIR APPLICABLE SAFETY STANDARDS

Controlled Goods	Definitions	Safety Standards
<p>3-pin portable socket-outlet</p> 	<p>An accessory having a set of three socket-contacts designed to engage with the pins of a corresponding plug and having means for the electrical connection of appropriate cables or flexible cords, for connection to, or integral with, a flexible cord, and which can be easily moved from one place to another while connected to the supply.</p>	<p>SS145: Part 2: 1997</p>
<p>Portable cable reel</p> 	<p>A device comprising a flexible cable or cord attached to a reel so constructed that the flexible cable may be completely wound onto the reel, and provided with a plug and one or more socket outlets.</p>	<p>SS 307: 1996</p>
<p>Instantaneous electric water heater</p> 	<p>An electrically operated stationary appliance for household and similar purposes and intended for heating water below boiling temperature with its rated voltage not more than 250 V for single-phase appliances and 480 V for other appliances.</p>	<p>SS 146: Part 2: 5: 2007</p>
<p>Mains pressure electric storage water heater</p> 	<p>An electrically operated stationary appliance for household and similar purposes and intended for storing and heating water below boiling temperature with its rated voltage not more than 250 V for single-phase appliances and 480 V for other appliances.</p>	<p>SS 146: Part 2: 8: 2007</p>

Note: Controlled Goods are to be tested to the specified safety standards. Controlled Goods that are tested to later year/amendment of standard than the year/amendment specified above are also acceptable.

6 CONTROLLED GOODS AND THEIR APPLICABLE SAFETY STANDARDS

Controlled Goods	Definitions	Safety Standards
Residual Current Circuit Breaker (RCCB) 	Residual Current Circuit Breaker (RCCB) namely a device intended to protect persons against indirect contact, the exposed conductive parts of the installation being connected to an appropriate earth electrode.	SS 97: Part 1: 2005
3-pin 13-amp socket-outlet 	3-pin 13-amp socket-outlet namely a 13A shuttered socket-outlet in single or multiple arrangements with associated controlling switches, for flush mounting in suitable box or for surface or panel mounting. The socket-outlet is suitable for the connection of portable appliances, sound-version equipment, luminaries, etc., in a.c. circuits only operating at voltage not exceeding 250 V r.m.s. at 50 Hz.	SS 145: Part 2: 1997 BS 4177: 1992 (cooker control unit) BS 7288: 1990 (socket-outlet with RCD)
3-pin round type 15-amp socket-outlet 	3-pin round type 15-amp socket-outlet namely a 15A shuttered socket-outlet which contains switch connected between the current carrying contact of the socket-outlet and the relevant supply terminal for flush mounting in suitable box or for surface or panel mounting. The socket-outlet is suitable for the connection of electrical appliances in a.c. circuits only operating at voltage not exceeding 250 V r.m.s. at 50 Hz.	SS 472: 1999
Domestic electric wall switch 	Domestic electric wall switch namely a manually operated general purpose switch for a.c. only with a rated voltage not exceeding 440V and a rated current not exceeding 63A, intended for household and similar fixed-electrical installations, either indoors or outdoors.	SS 227: Part 1: 2000 or IEC 60669-1: 1998

Note: Controlled Goods are to be tested to the specified safety standards. Controlled Goods that are tested to later year/amendment of standard than the year/amendment specified above are also acceptable.

6 CONTROLLED GOODS AND THEIR APPLICABLE SAFETY STANDARDS

Controlled Goods	Definitions	Safety Standards
Ballast for tubular fluorescent lamp 	Ballast for tubular fluorescent lamp namely a unit inserted between the supply and one or more fluorescent lamps which, by means of inductance, capacitance or a combination of inductance and capacitance or electronic circuitry, serves mainly to limit the current of the lamp(s) to the required value.	(magnetic type) IEC 61347-2-8: 2000 (electronic type) IEC 61347-2-3: 2000
Isolating transformer for downlight fitting 	Isolating Transformer for downlight fitting namely a transformer with input and output windings which are electrically separated to limit hazards due to accidental simultaneous contact with earth and live parts or metal parts which may become live in the event of an insulation failure.	(magnetic type) IEC 61558-2-6: 1997 (electronic type) IEC 61347-2-2: 2000 IEC 61347-2-13 (for LED downlight)

Note: Controlled Goods are to be tested to the specified safety standards. Controlled Goods that are tested to later year/amendment of standard than the year/amendment specified above are also acceptable.

SINGAPORE CONSUMER PROTECTION (SAFETY REQUIREMENTS) REGISTRATION SCHEME

7 SAFETY AUTHORITY'S REQUIREMENTS

The Safety Authority monitors the safety of the controlled goods sold in Singapore by investigating all complaints, incidents and accidents reported to the authority. Experiences gained are translated into the Safety Authority's Requirements. These requirements are to be fulfilled in addition to the applicable safety standards.

No	Items	Requirements
Applicable to all products		
1	Test certificate / Test report	Test certificate / Test report more than three (3) years old shall be rejected.
2	Controlled Goods incorporated with additional function	The additional function must be tested to its applicable safety standard.
Applicable to all electrical products		
3	All appliances	All appliances must be tested to 230 VAC.
4	Voltage selector (voltage mis-match test)	Appliance fitted with voltage selector shall be tested as follows: Connect appliance to 230 VAC mains with voltage selector switch to settings not suitable for operation at 230 VAC.
5	Tropical condition test	All appliances (with tropical test requirements in applicable Standards) shall comply with the tropical condition test as stated in the relevant IEC Standards.
6	Class I appliances (3-pin mains plug)	All Class I appliances must be fitted with 3-pin mains plugs complied with SS 145/SS 472 that are registered with the Safety Authority.
7	Class II appliances (mains plug)	a) All Class II appliances must be fitted with 2-pin mains plug (Appendix T) complied with EN 50075. b) Class II appliances that are fitted with 3-pin mains plugs must use plugs that are complied with SS 145 and registered with the Safety Authority.
8	Appliances rated ≥ 3 kW or connected to fixed wiring	Electric appliance ≥ 3 kW must be connected to fixed wiring. All connection to fixed wiring must be in accordance with Code of Practice CP5.
9	Detachable power cord set (consists of mains plug, mains cord and appliance connector)	Detachable power cord set must be listed in the test report critical component list.
10	Circuit diagrams	Circuit diagrams must be indicated with component's values for products tested to IEC 60065 and IEC 60950.
11	Circuit diagrams of electronic modules in electrical appliances	Circuit diagrams of the electronic modules in the electrical appliances must be provided.
12	Controlled goods likely to be treated as toy by children	Controlled goods, having an enclosure, which is shaped and decorated so that it is likely to be treated as a toy by children, shall not be accepted for certification and registration.

SINGAPORE CONSUMER PROTECTION (SAFETY REQUIREMENTS) REGISTRATION SCHEME

7 SAFETY AUTHORITY'S REQUIREMENTS

No	Items	Requirements
Applicable to electric airtop		
13	Reboil switch	No part of the reboil switch is allowed to protrude into the water pot, even if it is located above the maximum water level mark.
Applicable to AC adaptor		
14	3-pin AC adaptor (Appendix V)	Test report showing that the 3-pin complied with sub-clauses 12.1 & 12.3 of SS 246 must be submitted.
15	2-pin AC adaptor (Appendix V)	The 2-pin (Appendix T) shall comply with EN 50075.
16	Detachable power supply cord set not supplied by Registered Supplier	Registered Supplier who is not supplying the detachable power supply cord set together with the AC Adaptor must provide written instruction to its customer on the type of approved detachable power cord set to use.
Applicable to computer products		
17	CD/DVD ROM (used in personal computer)	Test certificate showing that CD/DVD ROM has complied with IEC 825 must be provided.
18	Modem Card (used in personal computer)	Modem card incorporated in the personal computer must be tested at set level (sub-clauses 5.1 & 6 of IEC 60950) or at component level.
Applicable to ceiling fan and cycle fan		
19	Ceiling fan and cycle fan	<ul style="list-style-type: none"> a) These appliances must be tested to sub-clauses 5.7 and 5.8 of SS 360: 1992. b) Installation instruction must mention the 3 expansion bolts for fastening the main suspension, safety cord, expansion bolt with hook for fastening safety cord and mounting plate. (Appendix Q) c) Drawing (Appendix P) to show that the wires within the motor shaft are not stressed must be provided.
Applicable to portable/wall socket-outlet and portable cable reel		
20	Portable/wall socket-outlet and portable cable reel	<ul style="list-style-type: none"> a) If residual current device (RCD) is incorporated, its tripping current must be less than 30mA and operating time must be less than 0.1 second and testing to sub-clauses 9.9.2.1, 9.9.2.2, 9.9.2.3 and 9.16 of SS 97: Part 1: 2000 are required. b) The shutters screening the current-carrying socket contacts shall not be opened by the insertion of any corresponding SINGLE pin of the plug into any current-carrying socket aperture.
21	Wall switched socket-outlet (2 x single socket-outlet)	Single socket-outlet with 2-gang faceplate/frame must be fulfilled with the test requirements as 2-gang socket-outlet.
22	Remote controlled portable/wall portable socket-outlet	Remote controlled portable/wall socket-outlet shall not be allowed for registration.

SINGAPORE CONSUMER PROTECTION (SAFETY REQUIREMENTS) REGISTRATION SCHEME

7 SAFETY AUTHORITY'S REQUIREMENTS

No	Items	Requirements
Applicable to roaster		
23	Roaster	A metal ring (Appendix U) must be provided to prevent the roaster from falling off in case the glass bowl shattered.
Applicable to gas appliances		
24	Test pressure of town gas for gas appliances	All gas appliances must be tested to 20 mbar for town gas.
25	Specifications of LPG and Town Gas	All gas appliances must be tested to the specifications stated on Appendix X.
26	Gas appliances tested to EN 30-1-1: 1998	Testing to sub-clause 6.1.6 (Temperature of the LPG cylinder and its compartment) and sub-clause 6.2.1 (Ignition, cross-lighting and flame stability) must be carried out.
27	Flame failure device (FFD) incorporated in gas appliances	a) Test report showing that the FFD complied with EN 126: 1995 or EN 125: 1991 for gas appliance tested to EN 30-1-1 or AG 204: 1984 for gas appliance tested to AG 101 at component level must be provided. b) Testing to sub-clause 6.1.3 of EN 30-1-1 or sub-clause 3.6.13 of AG 101 at set level must be carried out.
28	Distance between burner and injector	The distance (Appendix R) between bottom of burner ring and tip of the injector must not be too far apart such that the flame may be heating part of the burner instead of the cooking appliance.
29	Gas oven	It is compulsory for all gas ovens to be fitted with flame failure device.
30	Glass viewing door for gas hob and gas oven	Test report showing that the glass of the viewing door complied with BS 3193: 1993 (Specification for Thermally Toughened Glass Panels for use in domestic appliances) must be provided.
31	Toughened glass gas hob	a) A brochure, entitled "Toughened Glass – A Shattering Experience?" must be included for each toughened glass gas hob put up for sale. (Order for the brochure can be placed with the Safety Authority) b) Additional testing and compliance with sub-clauses 2.1.14, 2.1.15, 2.1.17, 2.10.15, 2.11.2.2 & 5.7.5 of AG 101 are required for toughened glass gas hob tested to EN 30-1-1: 1998.
32	Gasket for elbow joint of gas cooker	Installation instruction must mention about the fixing of gasket for the elbow joint, if applicable. (Appendix S)
33	Glass-ceramic gas hob (simulated gas explosion test)	The gas hob must be subject to 'simulated gas explosion' test. The hob is filled with an explosive mixture of gas and detonated with a source of ignition.
Applicable to Residual Current Circuit Breaker (RCCB)		
34	RCCB	Registration of RCCB is limited to 30 mA sensitivity and the operating time must be less than 0.1 second. Electronic RCCB will not be accepted for registration.

7 SAFETY AUTHORITY'S REQUIREMENTS

No	Items	Requirements
Applicable to electric instantaneous and storage water heater		
35	Instantaneous electric water heater and mains pressure electric storage water heater	Heating elements used must not be of the "bare-element" type.
36	Water heater incorporated with residual current device(RCD)	Testing to sub-clauses 9.9.2.1, 9.9.2.2, 9.9.2.3 and 9.16 of SS 97: Part 1: 2000 are required.
Applicable to multiway adaptor		
37	Multiway adaptor with 3-pin socket-outlets or combination of 3-pin and 2-pin socket-outlets	<p>a) The socket contacts of the adaptor shall only accept 13A 3-pin mains plug complying with SS 145 and/or 2.5A 2-pin mains plug complying with EN 50075.</p> <p>b) The shutters screening the current-carrying socket contacts shall not be opened by the insertion of any corresponding SINGLE pin of the plug into any current-carrying socket aperture.</p> <p>c) A barrier or other acceptable means shall be provided on the engagement surface of the 2.5A 2-pin socket-outlet of the adaptor to PREVENT entry of any types of 2-pin mains plugs except those complying with EN 50075. (note: shutters cannot be regarded as barriers)</p> <p>d) Adaptor incorporates with switch would require additional test to sub-clauses 13.11, 17.1.3 and 18.1.3 of SS 145: Part 2: 1997.</p>
Applicable to plasma/LCD display monitor		
38	Plasma/LCD display monitor with TV tuner	Plasma/LCD display monitor tested to IEC 60950 would require additional test to clauses 9 (related to antenna only), 10.1, 10.2, 10.3 and 12.5 of IEC 60065.
Applicable to table lamp / standing lamp		
39	Child appealing table lamp/standing lamp	Child appealing table/standing lamp will not be allowed for registration unless it is powered by an AC Adaptor. Only the AC Adaptor would need registration.
Applicable to hot/warm & cold water dispenser		
40	Hot/warm & cold water dispenser	Hot/warm water dispenser shall be tested IEC 60335-2-21. Testing to IEC 60335-2-24 shall be required if the water dispenser is incorporated with compressor for dispensing cold water.

8 REGISTRATION OF SUPPLIER OF CONTROLLED GOODS

Suppliers who wish to supply the controlled goods into Singapore would first have to register with the Safety Authority before submitting their controlled goods to a CAB (Local) or CAB (Foreign – MRA) for certification. The suppliers having completed the registration process with the Safety Authority will thereafter be referred to as ‘Registered Suppliers’. The Registered Suppliers can decide later whether or not to supply the controlled goods. Registration is free-of-charge. A flow-chart for registration of supplier of controlled goods is found in Appendix B.

There are two ways that the supplier can submit the application for registration as a supplier of controlled goods as follows:

- A) By hardcopy
 - Duly completed Form RS01 (Appendix G)
 - A copy of the Certificate of Incorporation of Private Company or Certificate of Registration issued by ACRA

- B) By on-line e-Registration
 - Go to www.spring.gov.sg/safety
 - Click the link ‘CPS e-Services’
 - Follow the instructions as provided in the ‘e-Registration of Registered Supplier’

9 REGISTRATION OF CONTROLLED GOODS

When the Registered Suppliers decide to supply the controlled goods, they shall submit applications to CAB (Local) or CAB (Foreign – MRA) (Appendix Y & Z) for certification. The CAB (Local) or CAB (Foreign-MRA) shall, upon receipt of the applications, issue certification numbers to the Registered Suppliers to assist them in preparation of the SAFETY Mark. After the controlled goods have been successfully certified, the CAB (Local) or CAB (Foreign-MRA) shall issue Certificates of Conformity (CoC) (Appendix K) to the Registered Suppliers. The Registered Suppliers can then submit the CoC to the Safety Authority to register the certified controlled goods. In relation to Regulations 7(1)(b), 7(6) and 8(2), registration with CoC from a CAB (Local) as well as registration with CoC from a CAB (Foreign-MRA) will be automatic and effected immediately. However, additional requirements may be imposed under the terms and conditions of a particular MRA. The Safety Authority shall, upon receipt of the CoC, issue an Acknowledgement Receipt for Certificate of Conformity (Appendix M) to the Registered Suppliers. With the acknowledgement, the Registered Suppliers can then affix the SAFETY Mark (Chapter 13) either on the registered controlled goods or their packaging and commence supply.

The Registered Suppliers are required to maintain a Technical File on the registered controlled goods as specified in Chapter 14. A flow-chart for registration of controlled goods is found in Appendix C.

Registered Suppliers who have test reports issued by the Recognised Testing Laboratories (RTLs) (Appendix AA) or Testing Laboratories of the CABs (Local) (Appendix Y) or CABs (Foreign-MRA) (Appendix Z) can only apply to the CABs (Local) for certification of their controlled goods. The CABs (Local) shall certify the controlled goods without re-testing unless the test reports are found not to be in full compliance to the safety requirements specified in this booklet.

In cases where there are modifications to the registered controlled goods, the Registered Suppliers are required to inform the CABs (Local) or CABs (Foreign-MRA) or the Safety Authority depending on the type of modifications described in Chapter 12.

To register the certified controlled goods, the Registered Suppliers shall submit the following to the Safety Authority:

- Non-refundable registration fee of \$180 + GST per model in cheque made payable to “Standards, Productivity and Innovation Board” or “SPRING Singapore”.
- The CoC issued by CABs (Local) or the CoC issued by CABs (Foreign-MRA) with letter of authorisation from the holder of CoC if Registered Supplier is not the holder.

10 CERTIFICATE OF CONFORMITY

The Certificate of Conformity (CoC) is valid for three (3) years. Registered Suppliers who wish to continue supplying their registered controlled goods beyond three (3) years shall approach the CABs (Local) or CABs (Foreign-MRA) for re-certification before the CoC expires regardless of any changes to the controlled goods. A new CoC bearing the same certification number shall be issued. The Registered Suppliers shall submit the new CoC to the Safety Authority for renewal of the registered controlled goods. A flow-chart for renewal of registered controlled goods is found in Appendix D.

Registered Suppliers who own CoC without registering with the Safety Authority are not allowed to supply the certified controlled goods to the domestic market as the goods will be deemed as 'non-registered controlled goods'. Any person supply non-registered controlled goods shall be guilty of an offence under Section 11(2) of the Consumer Protection (Trade Descriptions and Safety Requirements) Act (Chapter 53).

Renewal of CoC

Registered Suppliers are to submit applications for renewal of expiring registered Controlled Goods six months before the expiry of the CoCs to CABs (Local) or CABs (Foreign-MRA) for re-certification. Applications submitted after the expired CoCs would not be accepted for renewal. Application for new registration supported by a valid CoC would be required for controlled goods with expired registration.

All applications for renewal shall be based on the listed edition or newer edition of the safety standards in Chapter 6. Should the edition of the safety standards on the CoC be earlier than the listed edition, supplementary testing on the difference(s) between the old and listed/newer edition or full type-test to the listed/newer edition must be carried out.

To renew the registered controlled goods, the Registered Suppliers shall submit the following to the Safety Authority:

- Non-refundable renewal fee of \$50 + GST per model in cheque made payable to "Standards, Productivity and Innovation Board" or "SPRING Singapore".
- The new CoC issued by CABs (Local) or CABs (Foreign-MRA).

Transfer of CoC from company A to a non-affiliated company B

- Company B to apply as a supplier of controlled goods if it is not a Registered Supplier
- Company B to approach CAB (Local or Foreign-MRA) (who initially issued the CoC) to apply for CoC with new certification number with 3 years validity
- Company to submit any other information or document as required by CAB
- Company B to submit the new CoC to Safety Authority for registration with a fee of \$180 + GST per CoC.

Transfer of CoC from company A to an affiliated company B

- Company B to apply as a supplier of controlled goods if it is not a Registered Supplier
- Company B to approach CAB (Local or Foreign-MRA) who issued the CoC and apply for a new CoC with the following options:
 - (a) to retain the certification number with the current expiry date; or
 - (b) to apply for new certification number with 3 years expiry date
- Company A to submit any other information or document as required by CAB
- Company A to submit the new CoC to Safety Authority for updating with a fee of \$50 + GST per CoC under option (a) or for registration with a fee of \$180 + GST per CoC under option (b)

10 CERTIFICATE OF CONFORMITY

Change in business registration (eg. sole-proprietorship to a limited company)

- The limited company to register as a supplier of controlled goods
- The limited company to approach CAB to change the CoC to the name of the limited company only and to submit any other information or document as required by CAB
- The limited company to submit the revised CoC to Safety Authority for updating with a fee of \$50 + GST per CoC

Change of trade name due to company restructuring or reorganising

- Registered Supplier to approach CAB (Local or Foreign-MRA) to change the CoC to the new trade name only and to submit any other information or document as required by CAB
-
- Registered Supplier to submit the revised CoC to Safety Authority for updating with a fee of \$50 + GST per CoC

11 CHANGE IN PARTICULARS OF REGISTERED SUPPLIER

In cases where there are changes to the particulars specified below of the Registered Suppliers, the Registered Suppliers are required to notify the Safety Authority **not less than two (2) weeks** before such occurrence under Regulation 15 of the Consumer Product (Safety Requirements) Regulations 2002.

- i) Company's name;
- ii) Company's registered address;
- iii) Name and title of person authorised to represent the company;
- iv) Telephone number;
- iii) Facsimile number;
- iv) Email address, etc.

The Registered Suppliers shall submit the following to the Safety Authority:

- a) Form RS02 (Appendix H).
- b) Certificate of Incorporation on Change of Name of Company issued by ACRA, if applicable.

12 MODIFICATION TO REGISTERED CONTROLLED GOODS

Modification (including technical and non-technical changes) refers to any change made to the registered controlled goods. Non-technical changes are (i) colour change; (ii) change relating only to factory location but without change in the manufacturing process (including testing facilities) or a change of the manufacturer; and (iii) change in the year of production.

The Registered Suppliers may approach the Safety Authority to determine whether re-certification of the registered controlled goods is required as a result of modification.

The Registered Suppliers shall update their technical file on the registered controlled goods with details of the change.

In a case where there is modification to the registered controlled goods, the following scenarios shall apply:

- (a) If the modification does not result in a change in the model number even though the change is a technical one:
 - i) The controlled goods do not have to be re-registered with the Safety Authority.
 - ii) The Registered Supplier only needs to submit the modification to the CABs (Local) or CABs (Foreign-MRA) for re-certification. The Registered Supplier is to update the technical file with the test report and certification attesting that the modification still meets the safety standard requirements.
- (b) If the modification does not result in a change in the model number and the change is a non-technical one, which does not affect the safety of the controlled goods:
 - i) The controlled goods do not have to be re-registered with the Safety Authority.
 - ii) The controlled goods do not have to be re-certified with the CABs (Local) or CABs (Foreign – MRA).
 - iii) The Registered Supplier only needs to update the technical file with the modification, e.g. merely change(s) in the aesthetics that does (do) not affect the safety of the controlled goods.
- (c) The Registered Supplier shall be responsible for ensuring that the modification does not compromise the safety of the controlled goods.
- (d) If the modification results in a change in the model number and the change is a technical one:
 - i) The controlled goods have to be re-registered with the Safety Authority as per procedure indicated in Chapter 9.
 - ii) The controlled goods have to be re-certified with the CABs (Local) or CABs (Foreign-MRA) as per procedure indicated in Chapter 9.
 - iii) A new CoC bearing a new certification number is required.
 - iv) The Registered Supplier needs to create a new technical file.

12 MODIFICATION TO REGISTERED CONTROLLED GOODS

- (e) If the modification results in a change in the model number even though the change is a non-technical one and does not affect the safety of the controlled goods:
- i) The controlled goods do not have to be certified with the CABs (Local) or CABs (Foreign – MRA).
 - ii) The controlled goods have to be registered with the Safety Authority. The Registered supplier is to declare clearly all the non-technical change(s) in Form RS03 (Appendix I) and submit it to the Safety Authority together with the registration fee of \$180 + GST and clear photographs of the external view (i.e. showing the complete appliance); internal view (i.e. showing the safety components); rating label; mains plug, etc.
 - iii) The Safety Authority shall issue a Certificate of Conformity with new certification number to the new model number of the controlled goods to the Registered Supplier if the modification is accepted by the Safety Authority. Thereafter, the Registered Supplier can affix the SAFETY Mark using the new certification number and commence supply of the controlled goods.
 - iv) The Registered Supplier needs to create a new technical file.

Objective and rationale

Marking of registered controlled goods will enable consumers to differentiate between the registered and non-registered controlled goods and to participate in the enforcement. It also serves as a deterrent and a means to check for non-registered controlled goods in the market.

Marking

All controlled goods registered with the Safety Authority must bear the SAFETY Mark before they can be supplied to the Singapore market. Registered Suppliers are responsible for ensuring that their registered controlled goods are affixed with the SAFETY Mark in accordance to the guidelines stipulated by the Safety Authority as provided for in Appendix N. The Safety Authority will conduct spot-checks on manufacturers' / importers' / traders' warehouses when it is deemed necessary.

Where to apply the SAFETY Mark

The SAFETY Mark can either be affixed on the controlled goods or their packaging (to be affixed in a prominent location).

Preparation of SAFETY Mark

The CABs (Local) or CABs (Foreign – MRA) shall allocate certification numbers to the Registered Suppliers that have submitted controlled goods for the purpose of certification. The allocated certification numbers are to help Registered Suppliers in preparing the marking of the controlled goods in advance. It does not imply that the controlled goods have been certified by the CABs (Local) or CABs (Foreign – MRA) or registered with the Safety Authority. Registered Suppliers shall mark the controlled goods **ONLY** upon receiving the '**Acknowledgement Receipt for Certificate of Conformity**'.

Certification Number

The certification number (XXYYYY-ZZ) is a unique number issued by the CABs (Local) or CABs (Foreign – MRA) which is traceable to the Registered Suppliers and the registered controlled goods. The connotation of the certification number is as follows:

XX	=	year of certification (e.g. 01 for year 2001)
YYYY	=	serial number (e.g. 1234)
ZZ	=	CAB identity code (e.g. 11 for CAB 'A')

Using SAFETY Mark in Advertisements or Publicity Materials

Please refer to Appendix O for the guidelines.

14 TECHNICAL FILE

Every Registered Supplier in Singapore is required to maintain technical files of all their registered controlled goods as required in Regulation 16 of Regulations 2002. The contents of the technical files are specified in the table below. These files are to be maintained by the Registered Suppliers for **at least ten (10) years** from the date of expiry of the COC or the last renewed COC.

The maintenance of the technical files is necessary to enable the Safety Authority to carry out its investigation duties in the event of a complaint, incident or accident. Upon receiving request made by the Safety Authority, the Registered Suppliers must provide the relevant technical files to the Safety Authority within **seven (7) calendar days**.

In addition, the Registered Suppliers shall be responsible for the regular updating of the technical files especially if there have been **modifications** made to the registered controlled goods. Supplementary testing and certification are required if there are modifications with safety implications.

LIST OF DOCUMENTS TO BE INCLUDED IN THE TECHNICAL FILE

No.	Type of Document
1	Certificate of Conformity (in English version <u>only</u>)
2	Test Reports (in English version <u>only</u>)
3	Full Electrical Wiring/Circuit Diagrams or Service Manual (Circuit diagrams must indicate the component's values, or alternatively, be supported with Bill of Material/Part List.)
4	Photographs showing exterior (whole, front, top and rear view of controlled goods, nameplate, rating label, mains plug, etc.) and interior (critical safety components) views. Polaroid photographs as well as photocopies (in black and white) are <u>not</u> acceptable. Photographs for similar/derived models must also be kept together with the photographs of the basic model.
5	Rating Label (if it is not clear in the photograph) To provide an original or clear photograph or artwork.
6	User's Instruction Manual (English version must be included)
7	Record of Modification , if any

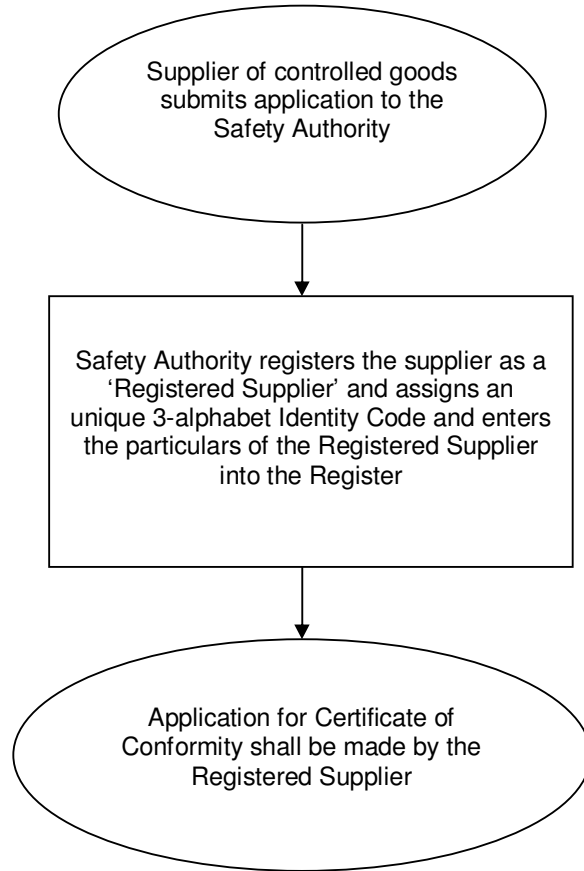

Note:

Registered Suppliers are strongly encouraged to maintain the testing results of every registered controlled goods. The testing results may be of help to determine whether the fault occurring in an incident or accident is attributed to a single product or a single batch.

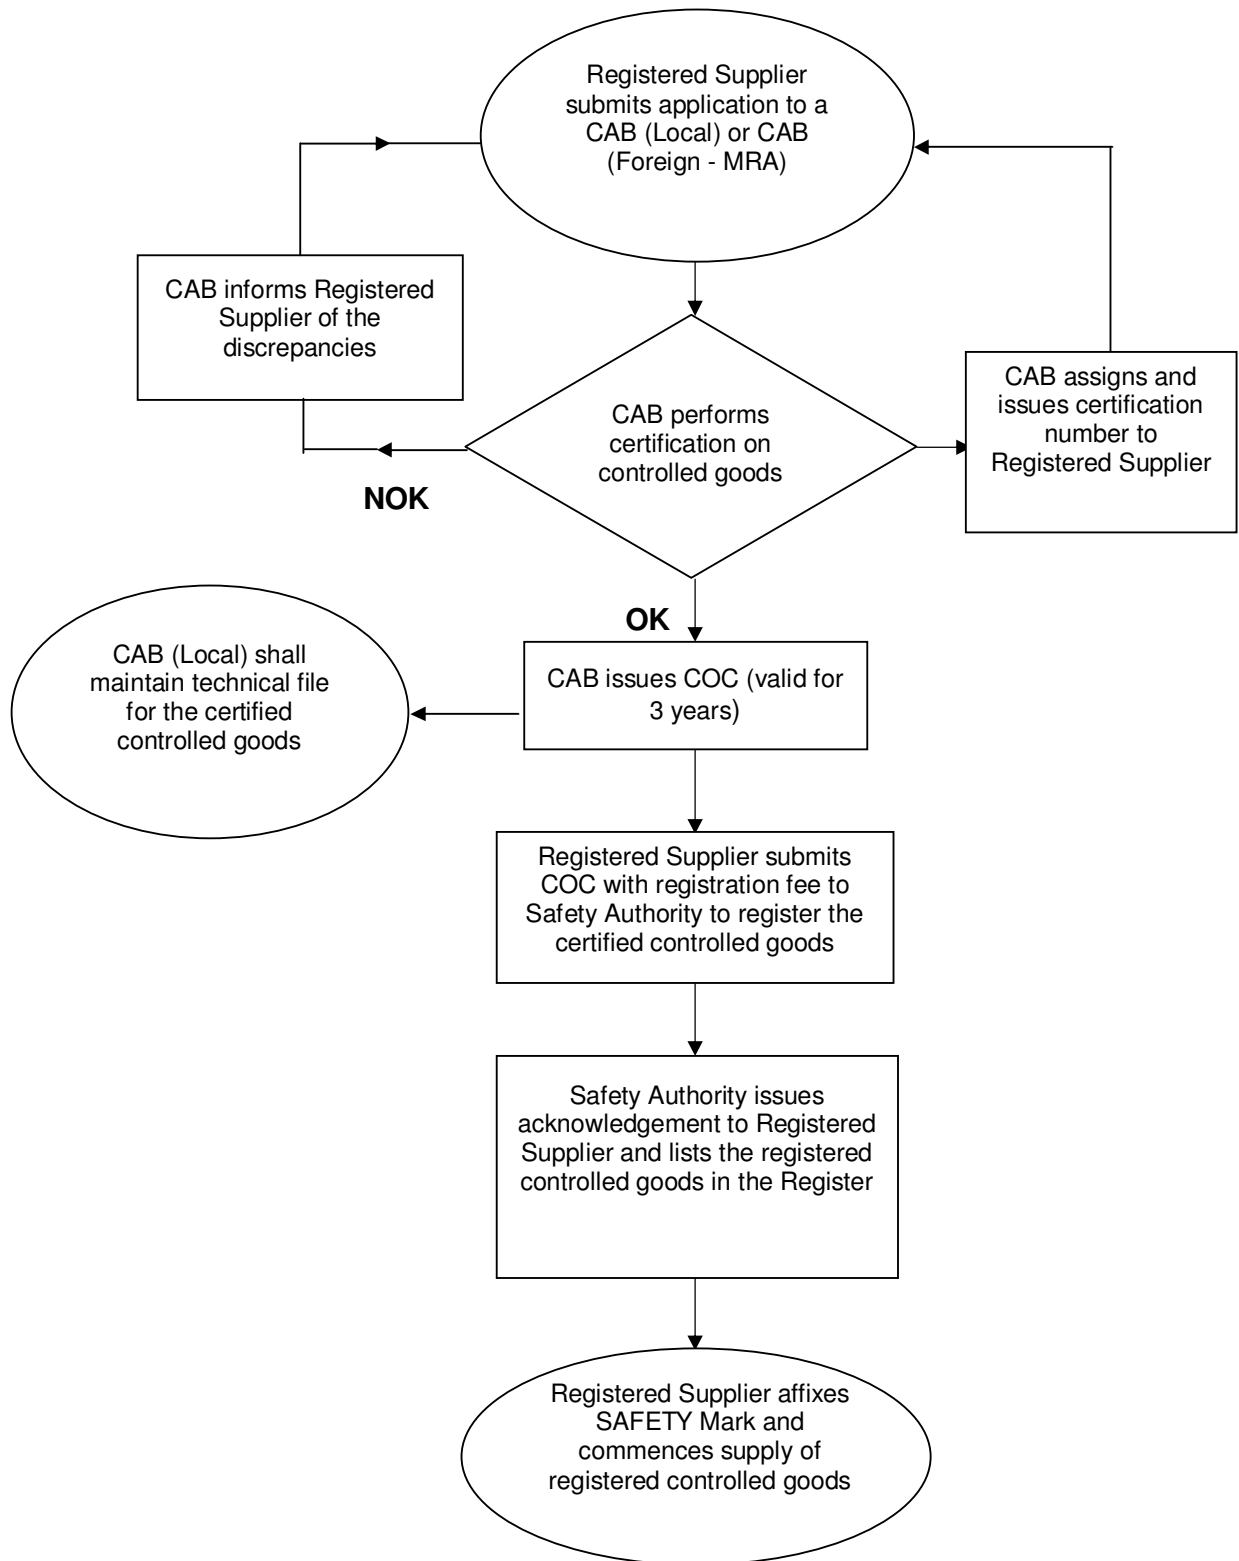

DEFINITIONS

- 1 **CAB** means Conformity Assessment Body that conducts Conformity assessment for Controlled Goods.
- 2 **CAB (Local)** means CAB that is located in Singapore and is designated by SPRING Singapore, the Designating Authority to issue COC for products or controlled goods supplied in Singapore specified in the First Schedule to the Consumer Protection (Safety Requirements) Regulations 2002.
- 3 **CAB (Foreign – MRA)** means CAB that is located in the MRA partner country and is designated by the Designating Authority of the MRA partner to issue COC.
- 4 **COC** means Certificate of Conformity issued by either CAB (Local) or CAB (Foreign-MRA).
- 5 **Controlled goods** means any goods of a type, class or description specified in the First Schedule of the Consumer Protection (Safety Requirements) Regulations 2002.
- 6 **MRA** means a Mutual Recognition Agreement or Arrangement between Singapore and any other country/customs territory.
- 7 **RTL** means a Recognised Testing Laboratory referred to in Part V of the Singapore Productivity and Standards Board (Conformity Assessment) Regulations 2002.
- 8 **Registered controlled goods** means any controlled goods registered with the Safety Authority under Regulation 7 of the of the Consumer Protection (Safety Requirements) Regulations 2002.
- 9 **Safety Authority** means the Standards, Productivity and Innovation Board (SPRING Singapore) (formerly known as Singapore Productivity and Standards Board) established under Section 3 of the Singapore Productivity and Standards Board Act (Chapter 303A).
- 10 **SAFETY Mark** means the SAFETY Mark specified in the Second Schedule of the Consumer Protection (Safety Requirements) Regulations 2002.
- 11 **IEC** means the International Electrotechnical Commission.
- 12 **SS** means Singapore Standard.
- 13 **GST** means Goods & Services Tax

GUIDELINES FOR COMPLETING FORM RS01

- 1 **Supplier's FULL Business Name**
Name of the company registered in Singapore with the Accounting and Corporate Regulatory Authority (ACRA) applying as a "Registered Supplier".
 - 2 **Supplier's FULL Registered Address in Singapore**
Registered address of the company registered with the ACRA.
 - 3 **Supplier's Business Registration Number (issued by ACRA) in Singapore**
Business registration number of the company issued by ACRA.
 - 4 **Types of Controlled Goods intended to supply in Singapore**
Controlled goods that the supplier wishes to sell in the Singapore domestic market.
 - 5 **Name and Title of Person authorised to represent the above Supplier (must be a staff of Supplier)**
Name and title (designation) of person appointed by the company to be in-charge of submission of Certificate of Conformity (COC) as well as to liaise with the Safety Authority.
- Authorised Signature**
The signature of the staff authorised by the company to be responsible for the registration of controlled goods.
- Name and Title of Signatory**
The name and title (designation) of the staff authorised by the company to be responsible for registration of controlled goods.
- Company's Registered Seal/Stamp**
The registered seal or rubber-stamp of the company.
- Date**
The date of the day that FORM RS01 is signed.

Registration as Supplier of Controlled Goods

For Official Use Only			
Received On

(A) EXAMPLES OF CONTROLLED GOODS

The following are some examples of controlled goods. The examples are by no means exhaustive and therefore, products not listed here do not mean they are not controlled goods. The detailed definitions of controlled goods are stated on Chapter 6 of this Information Booklet. If you are uncertain whether your product falls within the definitions of controlled goods, please fax or email the catalogues and specifications to the Safety Authority at (65)6278 9885 or safety@spring.gov.sg for clarification.

(B) EXAMPLES OF NON-CONTROLLED GOODS

The following are some examples of products that are currently not in the list of controlled goods and therefore deemed as non-controlled goods under the Consumer Protection (Safety Requirements) Regulations 2002. However, these non-controlled goods may be controlled under other schemes of other regulatory authorities. The products listed here are meant for reference only. It does not mean that they cannot be included as controlled goods in the future. The detailed definitions of controlled goods are stated on Chapter 6 of this Information Booklet.

Meanwhile, the onus of ensuring that these products and their accessories are safe rest with you and this advice is given without prejudice to any amendments to the Consumer Protection Act, its Regulations or the List of Controlled Goods.

<ul style="list-style-type: none"> • Air cleaner / Air purifier / Air steriliser / Air ioniser / Air humidifier • Altar lamp • Baby food warmer • Baby milk bottle steriliser • Battery • Bread maker • Battery charger • Body massager • Bulb / Fluorescent lamp • Camping stove/non re-usable gas canister • Can opener • Car audio • Coffee grinder • Commercial LPG system • Cooker hood • Cloth steamer • Chest/standing freezer • Car vacuum cleaner • Centrally operated vacuum cleaner system • Components used in PCs • Cup warmer • Dishwasher • DC operated vacuum cleaner/Cordless vacuum cleaner • Dehumidifier • Energy saving device • Electric ice crusher • Electronic disinfectant • Electronic type-writer • Electronic wall-switch • Electric chocolate maker • Facial steamer • Foot massager • Fluorescent tube • Fax machine / Photocopying machine (not link to personal computer) • Gas operated water heater 	<ul style="list-style-type: none"> • Hand dryer • Hair steamer / hair curler / hair styler • Ice-cream maker • Insect/Mosquito killer • Juke box • LPG barbeque grill • Light bulb • LED table lamp • Multiway adaptor with solely 2-pin socket-outlet • Massage chair (mains operated) • Milk frost maker • Misting fog fan • Night light • Portable television operates on battery supply only. (e.g. car battery) • Pressure cooker • Portable single unit air-conditioner • Portable socket-outlet with solely 2-pin socket-outlet • Portable cable reel for industrial use • SPA machine • Steam steriliser • Steam cleaner • Security alarm system • Socket for fluorescent lamp • Starter socket • Soyabean milk maker (using soyabean) • Split system air-conditioner (fixed) • Solar cooker (using high intensity light bulbs) • Trouser press • Tumbler dryer (clothes dryer) • Uninterrupted power supply (UPS) • Vending machine • Ventilation fan / Exhaust fan • Video cassette rewinder • Water distiller • Wine cooler
---	---

Important Note:

Most of the above listed non-controlled goods are regulated under the Consumer Protection (Consumer Goods Safety Requirements) Regulations 2011 (CGSR) effected from 1 April 2011. For information on CGSR, please refer to 'Consumer Protection (Consumer Goods Safety Requirements) Regulations 2011 Information Booklet which is available at www.spring.gov.sg/productsafety.

To: Registered Supplier

Date of registration: _____

Dear Sir/Madam,

We acknowledge receipt of Certificate of Conformity,

Certificate Number: _____,

for registration of controlled goods, _____,

Trade Name: _____,

Model Number: _____,

and would like to confirm that the controlled goods are entered into the Register of Registered Controlled Goods, pursuant to the Consumer Protection (Safety Requirements) Regulations 2002.

*Registration Officer
for Safety Authority*

GUIDELINES FOR USING SAFETY MARK ON THE REGISTERED CONTROLLED GOODS

The SAFETY Mark comprises of a safety logo enclosed in a square on the left and the word "SAFETY MARK" enclosed in a rectangle on the right. Below the logo is a unique certification number traceable to the registrant. The colour used is Pantone 287C Blue Colour

X X Y Y Y Y - Z Z

1) SAFETY Mark without Contrasting Background (e.g. embossed on body of controlled goods)

The safety logo, letters and certification number shall be of raised or lowered depth of not less than 0.51 mm.

The SAFETY Mark (consisting of both the safety logo and the word "SAFETY MARK") shall have a height of not less than 9.5 mm. The certification number shall have a height of not less than 2.8 mm.

Any SAFETY Mark with dimension smaller than the above has to be approved by the Safety Authority.

2) SAFETY Mark with Contrasting Background (e.g. silk screened on body of controlled goods or printed on rating labels or carton boxes or as standalone adhesive labels)

The SAFETY Mark (consisting of both the safety logo and the word "SAFETY MARK") shall have a height of not less than 6.0 mm. The certification number shall have a height of not less than 1.6 mm.

Any SAFETY Mark with dimension smaller than the above has to be approved by the Safety Authority.

3) Points for adherence

a) The SAFETY Mark shall be fully reproduced with the safety logo enclosed in a square on the left, the word "SAFETY MARK" enclosed in a rectangle on the right and the certification number traceable to the registrant across the bottom.

b) The SAFETY Mark can be embossed or silk screened on any coloured material or printed with the same colour used for rating labels or carton box markings. When printed as standalone adhesive labels, the colour of the safety logo, the background for the word "SAFETY MARK" and the certification number is Pantone 287C Blue Colour.

c) The SAFETY Mark shall be easily discernible on the controlled goods.

d) The SAFETY Mark shall be indelible and legible. The marking shall not be removed when rubbed lightly with a piece of cloth soaked with petroleum, spirit or water.

e) Rating labels or standalone adhesive labels with the SAFETY Mark shall not come loose or curled at the edges.

f) Please refer to the bromide provided by the Safety Authority for size relationship between the safety logo and the word "SAFETY MARK". They could be enlarged or reduced proportionately and still meet the size requirements stipulated in point (1) and (2), depending on whether the background is non-contrasting or contrasting.

Compliance is checked by visual inspection as well as the test mentioned in above paragraph (d)

GUIDELINES FOR USING SAFETY MARK ON THE REGISTERED CONTROLLED GOODS**4) SAFETY Mark on AC Adaptors**

For **AC Adaptors** (to be used with other products), registration is granted for the adaptors only and does not cover the other products. Therefore, only the adaptors should be affixed with the SAFETY Mark.

However, if the packaging containing both the AC Adaptors and other products is to be affixed with the SAFETY Mark, then the statement “**This SAFETY Mark applies to the AC Adaptor only**” has to be printed near the SAFETY Mark.

5) SAFETY Mark on 3-Pin Mains Plugs

For **3-pin mains plug** (13 and 15 Amperes), the SAFETY Mark must carry the statement ‘**for mains plug**’ below the certification number.

X X Y Y Y Y – Z Z

(for mains plug)

6) SAFETY Mark on 3-Pin Portable Socket-Outlet and Portable Cable Reel

For **3-pin portable socket-outlet** and **portable cable reel**, the SAFETY Mark must carry the statement ‘**for 3-pin portable socket-outlet**’ or ‘**for portable cable reel**’ respectively below the certification number.

X X Y Y Y Y – Z Z

(for 3-pin portable socket-outlet)

X X Y Y Y Y – Z Z

(for portable cable reel)

7) SAFETY Mark on Residual Current Circuit Breaker (RCCB), 3-pin Rectangular-type 13-Amp Socket-outlet, 3-pin Round-type 15-Amp Socket-outlet, Domestic Electric Wall Switch, Ballast for Tubular Fluorescent Lamp and Isolating Transformer for Downlight Fitting

These six categories of controlled goods which are part of the electrical installations are required to have the SAFETY Mark prominently affixed on the products to assist both consumers and electrical installation inspectors in identifying registered controlled goods.

8) Displaying of Registered Controlled Goods at Retail Outlets

To assist consumers in identifying registered controlled goods, Registered Suppliers are required to display the SAFETY Mark prominently on the front of all display sets in retail outlets.

9) SAFETY Mark Bromide

To assist Registered Suppliers in production of the SAFETY Mark, a bromide (camera ready logo) can be purchased from the Safety Authority at \$6 (GST included). To place order, please contact CPSD at Tel: 6279 1834 / 62791835, Fax: 6278 9885 or Email: safety@spring.gov.sg.

GUIDELINES FOR USING SAFETY MARK IN ADVERTISEMENTS OR PUBLICITY MATERIALS

- 1 The SAFETY Mark shall be used for products registered under the Consumer Protection (Safety Requirements) Registration Scheme.
- 2 The SAFETY Mark is only complete with the respective certification number. When used in advertisements, the SAFETY Mark with the certification number for each registered model should be used if there is more than one model advertised. If there is a space constraint, a single SAFETY Mark may be used.
- 3 The following statement may be used with the SAFETY Mark:
 - a) “The product (state the name and model no.) has been type-tested and considered to be in compliance with the safety requirements of the Standard (state the standard) and hence registered and entered into the Register of Registered Controlled Goods, (under pursuant to) the Consumer Protection (Safety Requirements) Regulations 2002. The registration is NOT an endorsement of the quality control system of the manufacturing process”.
 - b) “Look for the SAFETY Mark”
 - c) “Insist on the SAFETY Mark”
 - d) “Safe Home with the SAFETY Mark”.
- 4 Statements like “PSB-tested safe for use” or “PSB certified” should NOT be used. This is because the scheme only requires one sample of the said model to be type-tested. Use of the above statements will be misleading.
- 5 Any statement referring to the Consumer Protection (Safety Requirements) Registration Scheme or the SAFETY Mark, other than those stated in Paragraph 3 above should be sent to SPRING Singapore, Safety Authority, Consumer Product Safety Department (CPSD) for vetting before publication. Please contact CPSD at DID 62791834 / 62791835, Fax to 62789885 or Email: safety@spring.gov.sg

EXAMPLE

Safe Home with the SAFETY Mark

1 2 3 4 5 6 - 0 0

DRAWINGS SHOWING ACCEPTABLE AND NOT ACCEPTABLE FAN MOTOR SHAFT FOR DECORATIVE CEILING FAN

Figure A: Not Acceptable (wires under stress)

Figure B: Acceptable (wires not under stress)

Appendix Q

DIAGRAM SHOWING THE 3 EXPANSION BOLTS, SAFETY CORD, EXPANSION BOLTS WITH HOOK AND MOUNTING PLATE OF CEILING FAN

DRAWINGS SHOWING ACCEPTABLE AND NOT ACCEPTABLE DISTANCE BETWEEN THE BOTTOM OF THE BURNER RING AND TIP OF THE GAS INJECTOR

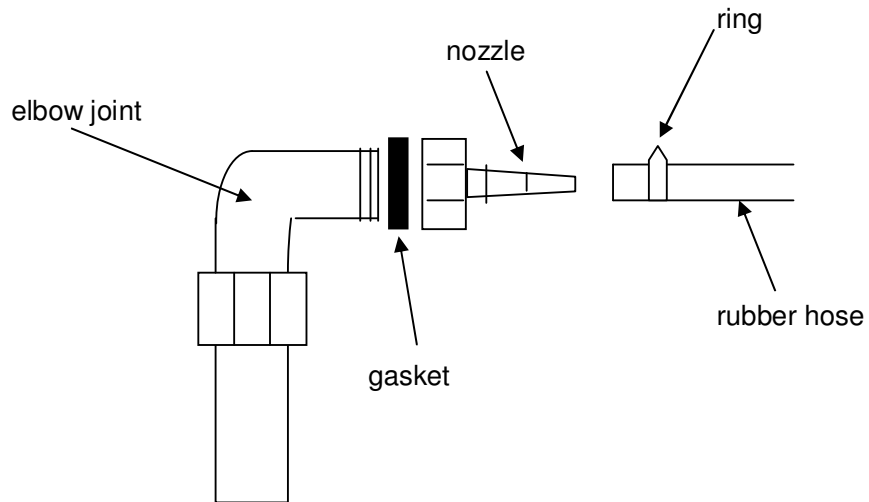

Figure A: Acceptable

The weak gas flow arises due to the distance between the tip of injector and bottom of burner is too far apart and causes the flame to heat the burner ring instead of the cooking appliance

Figure B: Not Acceptable

INSTALLATION INSTRUCTIONS FOR FIXING GAS COOKER ELBOW JOINT

The gasket depicted above is to prevent gas leakage. After installation, turn on the gas supply and use soap solution (never use naked flame) to check for gas leakage.

Summary of Update

Item	Before	After
Cover page	Version 4.1	Version 4.2
Chapter 6 Adaptor (pg 9)	-	Added IEC 60335-2-29: 2002 with A1 for (applicable for battery chargers)
Chapter 6 Decorative lighting fixture (pg 10)	-	Deleted the following: <ul style="list-style-type: none"> • IEC 60598-2-20: 1996
Chapter 6 Kettle (pg 11)	-	Added the following: <ul style="list-style-type: none"> • IEC 60335-2-21: 2002 (hot/warm water dispenser)
Chapter 6 Toaster, grill, hot plate, deep fryer, wok and similar appliances (pg 14)	IEC 60335-2-78: 2005 (applicable for outdoor electric barbeque grill)	Correction on the year of edition: IEC 60335-2-78: 2002
Chapter 7 Safety Authority's Requirements (pg 24)	-	Added the following: <ul style="list-style-type: none"> • Item 40 - Applicable to hot/warm & cold water dispenser
Chapter 8 Registration of Supplier of Controlled Goods (pg 25)	-	Added he following: <ul style="list-style-type: none"> • By on-line e-Registration
Chapter 10 Certificate of Conformity (pg 27-28)	-	a) Added the sub-heading "Renewal of CoC" b) Re-constructed the 4 th paragraph c) Added the following scenarios where application for CoC is required: <ul style="list-style-type: none"> • Transfer of CoC from company A to a non-affiliated company B • Transfer of CoC from company A to an affiliated company B • Change in business registration • Change of trade name due to company restructuring or reorganising
Appendix J Examples of Non-controlled Goods (pg 45)	-	Added the following: <ul style="list-style-type: none"> • Gas operated water heater • Milk frost maker • Clothes dryer Added the 'Note' below the table
Appendix Y & Z Conformity Assessment Body (CAB) & Recognised Testing Laboratory (RTL)	-	Added a column for safety standards for CABs and RTLs for certification and testing respectively

Summary of Update

Appendix Y Intertek Testing Services (S) Pte Ltd (pg 64)		Added the following: <ul style="list-style-type: none"> • Gas cooker
Appendix Y Centre Testing International Pte Ltd (pg 66)	-	Added the following: <ul style="list-style-type: none"> • Adaptor for i) Electronic appliances ii) Computer/telephonic appliances • Any other audio products • Home computer system (inclusive of monitor, printer, speaker and other mains operated accessories) • High-fidelity set • Laser disc set • Television/video display unit • Video cassette recorder
Appendix Y TUV SUD PSB Pte Ltd (pg 67 & 68)	-	Added the following: <ul style="list-style-type: none"> • Adaptor for table/standing lamps • Water dispenser under Kettle • Socket-outlet with RCD under 3-pin 13-amp socket-outlet
Appendix Z Intertek Testing Services (Taiwan) Ltd, (Safety Laboratory) (pg 77)	-	Deleted the following: <ul style="list-style-type: none"> • Electronic ballast • Isolating transformer for downlight fitting
Appendix Z Aerospace Industrial Development Corporation, Electromagnetic Effects Laboratory (pg 78)	-	Added the following: <ul style="list-style-type: none"> • Any other audio products • High-fidelity set • Television/video display set
Appendix AA Intertek Testing Services Hong Kong Ltd (pg 81)	-	Added the following: <ul style="list-style-type: none"> • Cooker control unit
Appendix AA TÜV Rheinland Taiwan Ltd (Taichung Branch) (pg 82)	10F, No. 219 Min-Chuan Road Taichung 403 Taiwan	No. 9, Ln. 36 Minsheng Road Sec. 3, Daya District Taichung City 428 Taiwan, R.O.C.

Summary of Update
